## EDUCATION

- B.Tech. Computer Science Engineering – Kallam Haranadhareddy Institute of Technology, Guntur.

## SKILLS

- HTML, CSS3, JavaScript
- JSON, vue.js, Python
- MVC, GIT

# SIVANNARAYANA GOWRA

## SOFTWARE DEVELOPER

**TO SECURE A CHALLENGING POSITION THAT UTILIZES MY YEARS OF EXPERIENCE, WHILE ALLOWING ME THE OPPORTUNITY TO GROW PROFESSIONALLY.**

## EXPERIENCE

**FINSE TECHNOLOGIES PVT LTD, BENGALURU**  
**OCTOBER 2023 – FEBRUARY 2025**

### RESPONSIBILITIES

- Creating responsive, visually appealing, and interactive web pages using HTML, CSS, and JavaScript
- Making sure websites work smoothly on different browsers and devices.
- Improving website speed, loading times, and overall user experience.
- Working closely with backend teams to integrate APIs and ensure seamless functionality.
- Identifying and fixing UI/UX issues, ensuring a bug-free and smooth user experience.

## CERTIFICATION

I completed an internship as a Software Development Engineer at Finse Technologies Pvt Ltd, working on a Python-based project. My role involved API integration, data processing, and debugging. This experience enhanced my coding skills and problem-solving abilities.

**Duration: 6 Months**

## PROJECT

### AI POWERED ACCOUNTING AND BILLING SOFTWARE

Description: Our vision is to streamline operations within the business sector by significantly reducing the reliance on manual data entry processes. By doing so, we aim to simplify business operations, allowing for greater efficiency and time savings. Our goal is to empower businesses to operate more seamlessly, enabling them to allocate more time and resources to core activities while minimizing unnecessary manual efforts.

#### 1. Automatic Entry of purchase bills from email or pdf

Implement an email/PDF integration feature for automated bill entry by forwarding invoices to a designated email. Use AI to extract key details like invoice numbers, dates, items, quantities, prices, and vendors. The extracted data is automatically entered into the inventory database.

#### 2. User-Friendly Mobile App

Offer a mobile application with a user-friendly interface, allowing users to access the software's functionalities on the go. This app should provide real-time updates on inventory status, alerts, and allow users to perform necessary actions remotely.

Technologies: HTML, CSS, Vue.js and typescript,

**Duration: 11 Months**
